All-Canadian Cleantech Index continues to outperform the S&P/TSX Composite

Cleantech 10™ list pinpoints the top publicly traded cleantech companies in Canada

TORONTO, October 28, 2010 – Today, Corporate Knights Magazine unveiled the preeminent list of Canadian public and private cleantech companies, the *Cleantech 10™* and *Next 10*. Corporate Knights has been following cleantech companies since 2007 and highlighting the companies poised to make it big. The *Cleantech 10™* and *Next 10* represent Canada’s best publicly and privately held companies in the Cleantech realm, and span a range of sectors from desalination to biofuels to solar technology.

The CEOs of the *Cleantech 10™* and *Next 10* will open the Toronto Stock Exchange on November 17, 2010. Toronto Stock Exchange (TSX) and TSX Venture Exchange are the leading growth markets for clean technology companies. Almost 130 clean technology companies are listed on the Exchanges, and as of September 30, these issuers had raised \$1.1 billion in equity capital (YTD). Last March, the TSX launched the S&P/TSX Clean Technology Index, a benchmark maintained by Jantzi-Sustainalytics that tracks 23 domestic firms that develop and deploy green technologies. Several of these firms are in the *Cleantech 10™*.

Since the *Cleantech 10™*’s inception in 2007, it has outperformed the S&P/TSX Composite by 23 per cent (using an unweighted average of the past three *Cleantech 10™*’s returns as of October 25, 2010 and excluding dividends).

“With nine billion people on the horizon on a planet of finite resources, the space race for which country can make the most productive use of resources is on, and these companies are Canada’s great green hope,” says Toby A. A. Heaps, editor-in-chief of Corporate Knights.

The Corporate Knights *Cleantech 10™* was compiled by Corporate Knights Inc. and Cleantech Group LLC, the leading provider of Cleantech indices and information globally.

The 2010 Cleantech 10™

Company (by number of years on list)	Headquarters	Ticker	Number of years on list
Carmanah Technologies Corp.	Victoria, BC	TSX:CMH	4
RuggedCom*	Woodbridge, ON	TSX:RCM	4
WaterFurnace Renewable Energy*	Fort Wayne, IN	TSX:WFI	4
Westport Innovations Inc.*	Vancouver, BC	TSX:WPT	4
5N Plus Inc.	Montreal, QC	TSX:VNP	3
NEO Material Technologies Inc.	Toronto, ON	TSX:NEM	2
ATS Automation Tooling Systems Inc.*	Cambridge, ON	TSX:ATA	1
GLV Inc.*	Montreal, QC	TSX:GLV.B	1
Primary Energy Recycling Corp.	Oak Brook, IL	TSX:PRI	1
Pure Technologies Ltd.	Calgary, AB	TSX:PUR	1

* member of S&P/TSX Clean Technology Index

Next 10 Emerging Cleantech Leaders (alpha order), 2010	HQ City
Arxx Corp.	Cobourg, ON
Cavet Technologies	Toronto, ON
ecobee inc.	Toronto, ON
Ensyn Technologies Inc.	Ottawa, ON
Lotek Wireless Inc.	Newmarket, ON/St. John's, NL
Morgan Solar Inc.	Toronto, ON
Nexterra Systems Corp.	Vancouver, BC
Pond Biofuels Inc.	Toronto, ON
Saltworks	Vancouver, BC
Terragon Environmental Technologies Inc.	Montréal, QC

*Cleantech 10*TM companies falling off this year’s list are Canadian Hydro Developers, Magma Energy, Stantec, and Hemisphere GPS. While Transalta acquired Canadian Hydro Developers, both Magma Energy, and Hemisphere struggled with profitability and market performance. Stantec’s business is not purely clean or technologically-related, so it was removed from the list in favour of more “pure-play” companies.

New companies on this year’s list—ATS Automation Tooling, GLV Inc., Primary Energy Recycling Corp., and Pure Technologies—have exciting prospects in solar, waste energy capture and conversion, recycling solutions, and infrastructure management such as water leak detection.

How was CK Cleantech 10TM determined?

The *Cleantech 10*TM list was created by Rafael Coven, Managing Director and Index Manager of The Cleantech Index (CTIUS; cleantechindex.com), which underlies several Index-based funds such as the PowerShares Cleantech ETF (NYSE:PZD), and is the first and only index to cover cleantech companies across a broad array of industries.

We sought out technology-driven growth companies that have big impacts on resource efficiency and the environment—not simply those re-branding themselves as ‘green.’ A set of 18 screening criteria were applied to all TSX companies that Cleantech Group LLC use for their broad Cleantech Index. While the TSX has a large number of Cleantech stocks, they tend to be younger and smaller, so the screening criteria was applied with some leniency to allow for a rounded out top-ten list. A heavy emphasis was placed on purity (percentage of revenues or income from Cleantech business, and whether or not it’s really ‘clean’) and quality (strategy, management, financial strength, sector leadership). Other key criteria included growth, earnings, liquidity, capitalization, technology/intellectual property, and overall impact.

How was the Cleantech Next 10 determined?

The *Next 10* were selected by an advisory panel of Canada’s foremost authorities on cleantech, using four judging criteria: creativity and original approach, solving a business problem, clear business objective, and best chance of breaking through.

Next 10 Advisory Panel

Tyler Hamilton, *Energy Columnist*, Toronto Star and *adjunct professor of environmental studies*, York University

Andrew Heintzman, *Co-Founder*, Investeco

Denis Leclerc, *President and CEO*, Québec Cleantech Cluster

Nicholas Parker, *Executive Chairman*, Cleantech Group LLC

Tom Rand, *Director*, VCi Green Funds and *Practice Lead*, Cleantech and Physical Sciences at the MaRS Discovery District

Vicky J. Sharpe, *President and CEO*, Sustainable Development Technology Canada
